- > ****Check the box of the "Allow Live Trading", "Allow DLL import" and "Allow import of external experts"*****
- > Click Ok

Please contact Strive Scalper customer support to activate your MT4 live account.

Make sure you choose your settings before running Strive Scalper

Detailed Settings

| Broker | Any low spread broker | Leverage | 1:300 and above | | | | | | | | | | | | | | | | | | | | | | | |
|---|--|--|---|------------------|---------------------------|------------------------|--|--------------|--|------------------------|---|----------------|----------------------------|---------------|-------------|------------------|---------------|-------------|------------------|---------------|-----------|------------------|---------------|-----------|------------------------|--------------|
| Chart | Attach to the XAUUSD/GOLD chart. The naming differs according to the broker. | Licence ID | Find the Licence ID from the purchase email.Contact support if you are not sure where to find. | | | | | | | | | | | | | | | | | | | | | | | |
| Magic | Just some number that does its magic. Always use the same number. Leave it if you don't know what you are doing. | Enable Dashboard: | Toggle “No” to close the dashboard on your chart, by default it is set as “Yes”. | | | | | | | | | | | | | | | | | | | | | | | |
| Lot | Starting lot size (default 0.01). | Distance between Trades | Minimum distance before you open a new trade in pips. The smaller the distance, the faster the martingale layer tends to open. | | | | | | | | | | | | | | | | | | | | | | | |
| Maximum Lot | Maximum allowed lot size (default 5.12). | Mode | | | | | | | | | | | | | | | | | | | | | | | | |
| Maximum Trades | Maximum trade in 1 cycle. If you set this to 3, then it will only trade 0.01, 0.02, 0.04, and wait for profit. | <table><tr><th>Trading Mode</th><th>Starting Balance</th><th>Expected Profit</th></tr><tr><td>Super Algo - High Risk</td><td>\$5000-10000</td><td>15-25%/month</td></tr><tr><td>Super Algo - Low Risk</td><td>\$3000-10000</td><td>15-25%/month</td></tr><tr><td>Turbo Scalping</td><td>above \$10,000 /> \$10,000</td><td>20%-30%/month</td></tr><tr><td>M1 Scalping</td><td>\$4,000-\$10,000</td><td>15%-20%/month</td></tr><tr><td>M5 Scalping</td><td>\$4,000-\$10,000</td><td>10%-20%/month</td></tr><tr><td>M15 Swing</td><td>\$4,000-\$10,000</td><td>10%-15%/month</td></tr><tr><td>M30 Swing</td><td>low risk \$500-\$1,500</td><td>5%-15%/month</td></tr></table> | Trading Mode | Starting Balance | Expected Profit | Super Algo - High Risk | \$5000-10000 | 15-25%/month | Super Algo - Low Risk | \$3000-10000 | 15-25%/month | Turbo Scalping | above \$10,000 /> \$10,000 | 20%-30%/month | M1 Scalping | \$4,000-\$10,000 | 15%-20%/month | M5 Scalping | \$4,000-\$10,000 | 10%-20%/month | M15 Swing | \$4,000-\$10,000 | 10%-15%/month | M30 Swing | low risk \$500-\$1,500 | 5%-15%/month |
| Trading Mode | Starting Balance | Expected Profit | | | | | | | | | | | | | | | | | | | | | | | | |
| Super Algo - High Risk | \$5000-10000 | 15-25%/month | | | | | | | | | | | | | | | | | | | | | | | | |
| Super Algo - Low Risk | \$3000-10000 | 15-25%/month | | | | | | | | | | | | | | | | | | | | | | | | |
| Turbo Scalping | above \$10,000 /> \$10,000 | 20%-30%/month | | | | | | | | | | | | | | | | | | | | | | | | |

| M15 Swing | \$4,000-\$10,000 | 10%-15%/month | | | | | | | | | | | | | | | | | | | | | | | | |
| M30 Swing | low risk \$500-\$1,500 | 5%-15%/month | | | | | | | | | | | | | | | | | | | | | | | | |
| Trend Following | Turn this feature “On” to align with the trend and avoid trading against it. For the risk-takers aiming for higher profits, set it to Off”. | <p>*Reminder: Starting balance might change from time to time, check with our support to get the latest advice*</p> | | | | | | | | | | | | | | | | | | | | | | | | |
| Take Profit | Set your target profit level in pips. Strive Scalper will close the trade automatically when it reaches this point, securing your gains. | Trailing Step | Do not use any number lower than 5 pips. | | | | | | | | | | | | | | | | | | | | | | | |
| Trailing Start | Start trailing after pips. If you want to disableTrailing, set this number higher than Take Profit. | Daily Profit Goal (%) | The percentage (%) of profit aims to achieve daily, based on the account balance. Once this goal is achieved, the EA will stop trading for the day. | | | | | | | | | | | | | | | | | | | | | | | |
| Martingale Multiplier | Use 2.0 for optimal results. Set this to 1 if you wish to turn off martingale. | Stop Trading X Minutes Before News: | This setting decides how many minutes before the news you would like to stop trading. | | | | | | | | | | | | | | | | | | | | | | | |
| News Filter Mode | Set to "True" to enable News Filter or disable it by setting it to "False". | Start Trading X Minutes After News: | This setting decides how many minutes after the news you would like to resume trading. | | | | | | | | | | | | | | | | | | | | | | | |
| Note: Please make sure your device time zone follows your location server. (Especially in VPS, VPS device time must follow VPS server location timezone.) | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Min. Impact to Filter | <table><tr><th>Impact Level</th><th>News Filtered</th></tr><tr><td>Low</td><td>All news will be filtered</td></tr><tr><td>Medium</td><td>Medium and High impact news will be filtered</td></tr><tr><td>High</td><td>Only High-impact news will be filtered</td></tr></table> | Impact Level | News Filtered | Low | All news will be filtered | Medium | Medium and High impact news will be filtered | High | Only High-impact news will be filtered | Stop New Trades | When activated, this feature stops taking new trades after the existing ones are closed with a profit. To resume trading, simply turn it off. | | | | | | | | | | | | | | | |
| Impact Level | News Filtered | | | | | | | | | | | | | | | | | | | | | | | | | |
| Low | All news will be filtered | | | | | | | | | | | | | | | | | | | | | | | | | |
| Medium | Medium and High impact news will be filtered | | | | | | | | | | | | | | | | | | | | | | | | | |
| High | Only High-impact news will be filtered | | | | | | | | | | | | | | | | | | | | | | | | | |
| Stoploss on Trend Change | Set “Yes” to allow Stoploss on Trend Change, it allows an immediate stoploss of trades when EA detected a trend change, based on the ‘No. of Candles for Stoploss Confirmation’ and ‘Period used for Stoploss Confirmation’ set. | Equity Protection (%) | This feature allows you to safeguard your account balance by setting a percentage (%) threshold. | | | | | | | | | | | | | | | | | | | | | | | |
| Period used for Stoploss Confirmation | To set what timeframe the Trend Change should be referring to. You can choose from M30, H1 and H4. Default setting is H4. Example: Stoploss on Trend Change: Yes No. of Candles for Stoploss Confirmation: 8 Period used for Stoploss Confirmation: H1 Your position entered is Sell, trend changed to UPTREND after the 8th candlesticks in H1 timeframe, your trades will be stopped loss, and EA will be paused, you need to restart the EA to continue trading. | No. of Candles for Stoploss Confirmation | For you to decide how many candlestick to determine a trend change for Stoploss on Trend Change to refer to. Default setting is 8. | | | | | | | | | | | | | | | | | | | | | | | |
| Trade on Xday | | Enable Time restriction? | Set “Yes” to allow time restriction. Set “No” to trade all the time without restriction. During trade restriction, no new trades allowed, including martingale layer, but Take Profit and Stop Loss shall work accordingly. | | | | | | | | | | | | | | | | | | | | | | | |
| Start Time (24H)/ End Time (24H) | To set the trading time you wish the EA to trade. Example: Start = 4, End = 20, EA will trade from 4am to 8pm following your device/VPS time zone. After 8pm, EA will not place any new trades, until the next day’s 4am. | | | | | | | | | | | | | | | | | | | | | | | | | |
